

What We Do

Provide medical review of both federal (DOT) and non-federal (non-DOT) drug tests of all types. The majority of the review are for pre-employment, post-accident, and random. We also do a significant amount of medical reviews for court cases, school enrollment, follow-up and reasonable suspicion testing

Urine, hair, blood, and saliva are all reviewed by us.

Provide database management of employees for drug testing. Conduct random selections as required by clients

We reviewed a total of 7,100 DOT tests.

Non-DOT tests reviewed totaled over 3,500 positives.
